**Re: State Environmental Commission -- Petition #2006-18
Clean Air Mercury Rule (CAMR)**

Dear Ms. Corp:

Terry Crawforth
Director Department of
Wildlife

Enclosed for "drafting" by the LCB Legal Division is a proposed permanent regulation that amends NAC 445B.001 to 445B.3497 by adding a new program to control mercury air emissions from coal-fired electric utility steam generating units in Nevada. This action is in response to a federal requirement for states to control annual mercury emissions from coal-fired power plants.

Lew Dodgion
Carson City, NV

Please note that we have included a special set of recommendations at the beginning of the regulations. The recommendations are for consideration by the "drafter" of the regulation at LCB.

Don Henderson
Director Department of
Agriculture

Additional supporting information for this proposed regulation is available on the SEC website at the following address:
